REMARKS

RETURN TO
LIBRARY25X1X
SOURCE [REDACTED]

1. It was observed on 1 January 1951, that a second radio installation with four masts was erected on the western edge of the Staaken (N 53/ Z 65) airfield. The masts of the two installations were approximately the same height. The radio cabin of the new installation apparently consists of a frame covered with tarpaulins. There is a rod, approximately one third the height of the masts, on top of the two radio huts. *

25X1A

- * Comment. The erection of a second direction finder was reported by another source on 23 December 1950. [REDACTED] Its purpose is not known. To date, Staaken is the only airfield at which two DFs of the same type were erected side-by-side. For location of radio installations, see Annex.
